
Uniform sampling with replacement · 4,961 sessions · 1,000 trials · α = 0.05
Error and query trajectories continue to the diagnostic horizon after stopping
ε = 0.1: stopping
Perfect labels
PAC labels
Fraction stopped
Draws
Exact randomized-label error
5–95% of trials
Mean population error
Label-error budget ε/2
Error probability
Draws
Ground-truth queries / draws
Cumulative query fraction
Draws
ε = 0.15: stopping
